

HASSENE AFIF

AI Software engineer

hasseneafif@gmail.com | +21655039837 | <https://linkedin.com/in/hasseneafif>

Dynamic Software Engineer specializing in AI with 3 years of experience in full-stack software development, passionate about AI and Data. Proven track record of leading and delivering optimized, innovative solutions across multiple projects. Balancing creativity with critical thinking, precise and direct client communication while driving teamwork along the way.

Work Experience

AI Software Engineer

July 2022 - Present

Welyne

- Developed a data generation platform that reduced manual search time by 70% by scraping, cleaning, and filtering large datasets into subscription-based reports. (Python, React.js, Next.js)
- Designed and deployed multiple n8n automation workflows that increased processing efficiency by 40%, including an AI-powered insurance estimation companion to streamline data processing and decision support. (n8n, OpenAI GPT)
- Reduced return rates by 30% by developing Weefizz, a web app (PWA) that uses AI to automate sizing (React.js, AI).
- Led full-stack development of a T-Mobile partner, Fliggs, a Web3 mobile operator, resulting in a 120% improvement in performance scores and enhanced user experience (Next.js, React.js, Strapi, Node.js).
- Engineered and led multiple full-stack projects spanning web/mobile applications, APIs, and deployments, delivering scalable, production-ready solutions that improved performance, usability, and maintainability across diverse domains.
- Mentored and guided interns across multiple projects, fostering technical skills and collaboration.

Software Developer (Internship)

June 2021 - August 2021

Deco Pierre

- Improved operational efficiency by 60% by developing an e-commerce website and an ERP system back office. (React).

Software Developer (Internship)

August 2019 - September 2019

Central Bank of Tunisia

- Optimized validation times by ~40% by contributing to developing an app analyzing checks for validity (Android Native).

Skills

- **Frontend:** React.js, Next.js, JavaScript, TypeScript, Flutter, HTML, CSS
- **Backend & APIs:** Python, Node.js, Spring Boot, Strapi, PHP, C#, C, C++
- **AI & Automation:** GPT, LLaMA, n8n, Prompt Engineering, Fine-Tuning, AI Integration, MCP, RAG
- **Databases & DevOps:** SQL, MySQL, MongoDB, Docker, Git, REST APIs, PostgreSQL, Scrum, TDD

Education

Engineering Degree in Computer Science

Graduated : 2023

ESPRIT (Private School of Engineering and Technologies)

Languages

English (*Fluent*), French (*Fluent*), Arabic (*Fluent*), Spanish (*Beginner*)

Projects and Certifications

- Built Vestr AI, a stock prediction app using a fine-tuned model, for forecast accuracy . (LLaMa, Data scraping, React.js).
- Made Hass AI, an AI Agent/chat for rapid fine-tuning and quick portfolio integration. (Hugging face, Fine-Tuning).
- Built a real estate AI platform that intelligently ranks property offers according to user preferences. (MCP, OpenAI GPT).
- Engineered and delivered multiple full-stack applications, streamlining processes and enhancing user experiences

Certifications: IBM (Full Stack Developer), Board Infinity (.NET Full-Stack), Intel (AI Essentials), IBM (Data analysis for ML)
